this new international edition provides increased coverage of the procedures for estimating the cost of capital expanded coverage of risk management techniques and the use and misuse of derivatives and additional coverage of agency problems

this book describes the theory and practice of corporate finance we hardly need to explain why financial managers have to master the practical aspects of their job but we should spell out why down to earth managers need to bother with theory managers learn from experience how to cope with routine problems but the best managers are also able to respond to change to do so you need more than time honored rules of thumb you must understand why companies

and financial markets behave the way they do in other words you need a theory of finance

seminar paper from the year 2014 in the subject economics finance grade 6 0 schweizer notensystem university of liechtenstein früher hochschule liechtenstein language english abstract this paper is focused on comparing the capital asset pricing model the fama french three factor model and two modified versions of the fama french model in their ability to explain excess returns the first modified model contains the same explanatory variables as the fama french model but with an additional ar 1 process the second modification contains instead of an additional ar 1 an ar 2 process evaluated by the adjusted r^2 and the akaike information criterion the fama french model yields a higher model fit than the capm the modified fama french model with an ar 2 process leads to significant results for the twice lagged return in the model in four out of six tested portfolios therefore the in sample regression reveals a higher model fit of the modified fama french model with ar 2 in comparison to the other three models since the results differ from a regression in the subsequent period the results are most likely spurious nevertheless the authors show the higher model fit of the fama french three factor model in relation to the capm
